PRODUCT DATA SHEET

SLIDEGLOSS™

SPRAYABLE WATER SLIDE WAX

DESCRIPTION

SlideGloss™ is a unique sprayable wax that produces the brightest "WET LOOK SHINE" to dull color faded fiberglass water slides. It has been specially formulated to be easily sprayed-on and immediately wiped-off by your internal maintenance staff or seasonal employees. SlideGloss™ requires no rubbing, buffing, cure time or special application tools.

SlideGloss™ is perfect for touching up dull color faded fiberglass water slides when you don't have time to use a buffing polish or wax. Depending on rider usage, geographic location and weather conditions, one application typically lasts up to 1 week. One gallon will rejuvenate the interior surface of a standard 300 linear foot open flume body slide, roughly 3,000 sq. ft.

RECOMMENDED USES

SlideGloss™ is recommended to be used on interior riding surfaces and the exterior skin of water slides to bring back a 'LIKE NEW SHINE' and enhance appearance. Due to abrasion from riders, it has "LIMITED PROTECTIVE QUALITIES" on interior riding surfaces. SlideGloss™ is a high-viscous solvent based wax with superior wetting agents that can be used anytime a slide is looking dull, in need of a quick "FACE LIFT" or to reduce static charge and friction on the ride path. It is ideal to dress up the appearance of a slide prior to a promotional event. It will not attract dust like most other sprayable waxes due to its non-greasy formula.

DIRECTIONS FOR USE

For SlideGloss™ to be effective, the product must be applied to a clean and adequately prepped surface. Any dirt, grease, body-grime, bird droppings, wax and other surface contaminants should be removed first with SlideRenu® SlideDetergent (Refer to Product Data Sheet for Application Instructions). After the surface is washed, it should be rinsed with potable quality water through a pressure washer. To remove calcium build-up and hard water

mineral deposits, use SlideRenu® Calcitrol™ (Refer to Product Data Sheet for Application Instructions). Rinse the surface with water after using Calcitrol™ and let dry before applying SlideGloss™. Shake well before use and apply SlideGloss™ directly onto a dry surface in a swirling motion using a clean, white, dry cloth or spray bottle. Immediately wipe-off SlideGloss™ using a white, dry cloth. Due to abrasion from riders and constant water flow, two applications are recommended on the rider glide path. When layering SlideGloss™, wait 30 minutes before applying the next application.

PROPERTIES

- APPEARANCE: Bland/Clear Liquid
- ODOR: Slight Sweet Scent
- COVERAGE: 1 Gallon Yields 2 Protective Coats Which Will Cover the Interior Surface of a 300' Open Body Slide; Approximately 3,000 sq. ft.
- VOC's: None
- PH: Neutral
- SHELF LIFE: 12 Months. Keep From Freezing.
- APPLICATION TEMPERATURE: 50F – 100F.
- FLAMMABLE: No
- BIODEGRADABLE: Yes

DO NOT MIX THIS PRODUCT WITH ANY OTHER CHEMICALS

CAUTION: KEEP OUT OF REACH OF CHILDREN

Eye and skin irritant. In case of contact with eyes or skin, flush with water for 15 minutes. If irritation persists, seek medical attention. If swallowed, take large amounts of water. Do not induce vomiting. CONTACT PHYSICIAN IMMEDIATELY.
